DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-18,20-28,30-39,41-48,50-56,68,69,71,72,86-91 are rejected under 35 U.S.C. 103(a) as being unpatentable over AF 300 from Nufarm MSDS, Infosafe No. NU003. AF 300 MSDS teaches a composition comprising 2,4-dichlorophenoxy acetic acid, ethoxylated alcohol, plus solvent 400 (kerosene). See MSDS. AF 300 MSDS does not teach or suggest the instant amounts of ingredients. It would have been obvious to one having ordinary skill in the art to determine the optimum amount of ingredients. One would have been motivated to do this in order to develop the most effective herbicide composition.

Claim Objection

Claims 57-65,67,70,82-85 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant composition comprising 2,4-dichlorophenoxy acetic acid ester and instant amount of aromatic solvent.
